

Concept Note and Agenda

The 7th ASEAN Energy Outlook (AEO7) Dissemination to The Energy Studies Institute, National University of Singapore Wednesday, 31st May 2023 | 9.00 – 11.00 AM (Local Time)

1. Background

Since its inception, the ASEAN Centre for Energy (ACE) flagship publication, ASEAN Energy Outlook (AEO), has become one of the most important documents to support ASEAN energy policy and planning. AEO complements and supplements the APAEC, providing an overview of the current energy landscape and exploring pathways of the achievement of regional (and national) energy targets, and beyond. Especially, the AEO addresses the Programme Area No. 6 Regional Energy Policy and Planning, Outcome-based Strategy 1: To enhance the profile of ASEAN energy sector internationally, Action Plan 1.2: Publish regular regional energy outlooks and strategic reports on the thematic issue.

Continuing the previous efforts, ACE launched the 7th edition of the ASEAN Energy Outlook (AEO7)¹ at the 40th ASEAN Ministers on Energy Meeting (AMEM) in Cambodia². AEO7 marks the first ASEAN energy outlook, where ASEAN takes full leadership in data gathering, modelling, writing, and dissemination. It was developed by ACE in collaboration with national experts from ASEAN Member States (AMS) and guided by the ASEAN Regional Energy Policy and Planning Sub-sector Network (REPP-SSN). Support was provided by the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH through the ASEAN-German Energy Programme (AGEP), Ministry of Economy, Trade and Industry (METI) of Japan, and ASEAN Climate Change and Energy Project (ACCEPT).

After the development of AEO7, ACE will conduct country launching events, for selected ASEAN member states, to share the insights on how the energy data were gathered, processed and developed into an outlook and the highlighted modelling findings, especially for the visited country.

2. Objectives

1. To improve the ownership of ASEAN member states on the AEO7
2. To widen the knowledge of key stakeholders on the key findings of the AEO7
3. To gather inputs and insights for the development of the next edition of AEO, AEO8, to be launched in 2024
4. To explore potential collaboration in research and any other forms.

3. Targeted Participants

The AEO7 Dissemination Seminar is expected to be attended by students, lecturers, researchers, and other related stakeholders.

4. Tentative Agenda

Date : Wednesday, 31st May 2023

Venue : National University of Singapore

SDE3-LT423 (Level 4)

4 Architecture Dr, School of Design and Environment

Singapore 117566

(Local Time)

Time	Programme	Speakers	Participants
9:00 - 9:10	Welcome remarks	Dr Yao Lixia Senior Research Fellow in Energy Studies Institute Dr Zulfikar Yurnaidi Manager of Energy Modelling and Policy Planning (MPP)	All
9:10 - 9:25	Current energy situation and policy in Singapore	Dr Yao Lixia Senior Research Fellow in Energy Studies Institute	All
9:25 - 9:40	ASEAN Energy Outlook (AEO) and its roles in regional energy cooperation	Dr Zulfikar Yurnaidi Manager of Energy Modelling and Policy Planning (MPP), ACE	All
9:40 – 9:55	AEO7 Modelling Findings: Supply and Demand - Regional Results - Country-level Results and Insights	Amira Bilqis Analyst of MPP, ACE	All
9:55 - 10:05	Q&A Session		
10:05 – 10:20	Investments and Measures for Clean Energy and Power Sector Resilience in ASEAN	Rika Safrina Senior Research Analyst of MPP, ACE	
10:20 – 10:30	Q&A Session		
10:30 – 10:35	Closing for Participants and Group Photos		All
10:35 – 11:00	Discussion on Potential Follow up Research and Next Steps for AEO8	Dr Zulfikar Yurnaidi and ESI, NUS Representatives	Assigned NUS members and ACE
